REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: While it is known in the art to provide mechanical, chemical, and biological filters in combination to filter aquarium water (see US Pat No. 5,965,016 to Suchowski et al.), and it is known to use a reticulated material in a biological filter (see US Pat No 5,217,616 to Sanyal et al.), in the examiner's opinion the prior art fails to teach or fairly suggest combining the known elements such that the elements have the recited positioning and operational elements of the instant invention. The instant invention provides the advantage of providing a single, compact filter unit for ready insertion into an aquarium filtration system to accomplish mechanical, chemical and biological filtration of aquarium water.

Drawings

2. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the instant drawings have lines numbers, and letter that are not uniformly thick and well defined and appear to contain solid black shading which is not permitted. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
